Submission: I reject the proposal very strongly. If there need any Savings to be made, why target only some part of community but not all.

The retirees have saved & saved during all their working life & duly paid their taxes. This is such a small gesture of what the govt can give back to the retirees who have contributed to the community. Furthermore the retirees, and a lot of them are volunteering in the community. These people need public transport to get to & from where they work!  
Why not look @ all politicians' perks, the big businesses who avoid paying tax!!

In summary, I think any government who wants to stay in power should look into their fairness of action. We as retirees are really fed up of being targeted to say the least.  
We do have a huge power base which we hope to strengthen & continue to look @ what this govt doing with fine toothcomb.
