Submission:

I don't have a lot to say but it seems to me that after working 50 years and paying taxes and then being self funded it seems unfair to have the privileges promised and delivered by past governments to be taken away. It undermines my belief in a honest and truthful government. I could not and would not vote for any government that took away one of the only aids offered to the retired. a price rise from \$2.50 to \$9.00 dollars over 300% increase is no more than robbery
