Subject: Fit for the future proposal and position

I would like to object to the ipart process and that of the government of NSW The entire process has tried to implement a program of Council Amalgamation that is from the start involved in a CONFLICT OF INTEREST in that GMS Councillors the Premiere himself and all the politicians And the Lobbyists are bias pure and simple Be it by perception or fact This entire process ah placed the democracy of this State And perhaps country at RISK There au one way ONLY and that is REFERENDUM as stipulTed I the LOCAL GOVERNMENT ACT and is BINDING ALL Other not I constitutionally OBJECT to IPART not objecting and to the CURRENT. GOVERNMENT agreeing to this process REFERENDUM. Now This establishes the need to spend \$\$\$\$\$\$of tax payers money on a process that is non democratic There are billions of developer money to be gained by getting councils to amalgamate with the implementation of this fit for the future plan For the reasons above council staff Nd councillors are maneuvering and being enabled to manipulate a process that has its legislation layer down When boundaries and representTion are affect ed a referendum MUST be call ANYTHING IESS is a breach of process and CONSTITUTIONAL responsibility This process MUST. STOP REFERENDUM NOW before some money is spent and communities PUSHED to something they do not want

MARGARET HOGG
