Date of submission: Friday, 5 February 2016

Submission: If the cheap fare were to be cancelled for non pensioners ie self funded retirees there would be massive impacts

More people would drive , with possibilities of more accidents as they age

Less people would take volunteer positions, leading to more government spending to plug the gaps left

More people would become isolated and home bound leading to more mental illnesses

U3A as an organisation that provides interest, support and education would suffer as people would not travel to functions

People would not travel to regional events and galleries so attendance numbers would drop

Not a good move overall
