Submission: It seems that the government just take take take!!! What about the little guy?
You have incentivised people to travel by public transport by making it free after 8 rides. Now you are taking it away? Typical.
Also most of the time in peak hour, we all have to stand and the buses and trains are filthy and you are trying to make us pay more - how does that work?

This is an outrage.

I am keen to hear what your excuses are for raising your prices when the services have not improved?!?!
