Submission: Hi,

As a resident of Dee Why catching a bus to work everyday I believe that this is utterly ridiculous! People using the public transport system day in day out should be rewarded not punished!

Why do you think that still so many people drive..... the price we are paying for the current public transport is a joke and should be reduced not increased!!!

Why should I be paying more if I am only catching 1 form of transport? Its not like we have much of a choice living on the Northern Beaches.

Doing what you are doing is only going to make the congestion worse on the roads because it is going to end up working out cheaper in petrol to drive to work. Of course everyone is thinking this and the roads are going to start getting worse!

The new B-Line bus system is starting to be looked at but why have the buses running with the prices you are asking us to pay. Everyone is going to start driving. I tell you now the quality I have experienced lately has been absolutely disgusting on the Sydney Buses and the fact we are already paying more than anywhere else in NSW is going to push me to want to drive and only use the bus every now and then. At least my car is more reliable and I wont have to pay as much in transport.

Before making decisions why don't you go out and catch public transport yourself and see the pain that everyone goes through and then question yourself if it is worth the price?
