Submission: Yet another sleight of hand trick for those of us who have spent over 50 odd years in the Australian workforce. Paying taxes, giving our all honestly and diligently and then the little bit of icing on the cake which enables us to cram as much in in the years left to us are likely to have the excellent \$2.50 fare hijacked. | use this fare at least 3 times a week to go into the city where I do over 6 hrs of gym work - in order NOT to be a burden on the Health system.

Politicians of all persuasions (and High Court Judges) are rewarded with gold cards etc. for not only them but their wives, widows also in perpetuity once they are put out to pasture. Overseas and interstate travel in carefree abandon. Why do the little people of this country always have to prop up the silvertails.

I presume our please will fall on deaf ears though and probably the next thing to be examined will be our discounted rates, electricity, gas and water charges.
