Submission: Originally the site chosen for a Sewage Treatment Plant and Water Recycling Facility was at 60 Avondale Rd which extends to land behind our property. Fortunately, after many complaints by the community, this was withdrawn and then to our surprise another application was made for an even bigger utility to be built just down the road on Freemans Drive. We consider this to be an entirely unsuitable position. It is close to existing houses and almost opposite a preschool, community centre and not far from the shopping centre. With all the heavy rain we experienced recently and with loss of power (some are still without power in Cooranbong) and huge runoffs of water we cannot imagine how the overflow would be contained. Hunter Water had a number of issues across its water and sewer network during this last week.
