Submission: I am writing to comment on the proposed changes to public transport costs. While I fully understand changes may be needed I strongly feel the proposed changes to Seniors current discount to be unfair and discriminatory. The \$2:50 cap on current transport costs unable older people to go out and be social and be involved in their community. I am one such user of the transport system. This current cap is ideal to encourage public transport use. A \$9:00 cap will encourage me to drive my car to many events as it would be cheaper to take the car then pay \$9 for the transport. I feel that changing discounts for seniors and pensioners will just encourage more cars on already congested roads. I strongly feel this is a justice issue for older people who,like me have worked all their lives and are now enjoying retirement. The public transport system enables people like me to get out and about and enjoy all NSW has to offer. I strongly disagree with raising the cap on pension and senior transport costs.
