**Submission:**

My submission relates to the Areas of Entitlement eligabililty and the RTO funding for the qulaification.

Are non-apprentices able to claim the entitlement funding for traditional trades courses when the qualification IS listed on the skills list? If not then this should be given support as it has the opportunity to increase the participation and number of skilled people available to work in those industries.

In the area of determining the RTO funding , the model should revolve around the UOCs as employers under the Apprenticeship system can choose any UOC that fits in th etraining package. Many of these UOCs require more resources and more costly resources to deliver and assess. eg cost of delivery for a unit with nom hrs 20 chosen vs the employer chosing a unit with a nom. hrs of 60 (repair vs Overhaul)
