Submission: I think that there is widespread support for an increase in the seniors fee of \$2.50 per day. It seems incongruous in 2016. An across-the-board rise to \$3.60 represents a 44% increase which is substantial but still remains affordable for many who need to travel frequently for reasons beyond leisure eg family support, care and many other reasons. Raising the seniors fare to \$9.00 represents an enormous 260% increase which by any reckoning would be regarded as excessive. With this in mind, the fairest approach is an across-the-board increase to \$3.60 with small periodic adjustments.
