Submission: Having lived in Melbourne when the Myki card was released I have used both systems and much prefer Opal. In regards to pricing I believe the prices should STAY THE SAME or REDUCE. The 8 trips then free travel is a good incentive, as it also makes us seem like a tourist friendly city.

As a full time worker who commutes on public transport every day, I would be very disappointed if the prices were to increase when there has not been a significant change in services.

That said, once the new light rail and other lines are built I would expect and be happy to pay more.
