Date of submission: Friday, 5 February 2016

Submission: I strongly object to the proposed change to the Opal card for seniors. I started work at the age of 15 and retired from full time employment at the age of 75 years which amounts to a great deal of taxation revenue to the government. I have never been the recipient of unemployment benefits or other government benefit in my life, I have paid into private health cover since age 17 and I will be 82 in April. If this government cannot see fit to give me this small travel concession in my declining years then I have been voting for the wrong party for many years but that could change come the next election.
