Date of submission: Wednesday, 3 February 2016

Submission: I am a self funded retiree living on a modest superannuation pension from my working life as a teacher., and a frequent user of public transport, almost always in off peak times. The proposed increase from a maximum of \$2.50 to \$9.00 would limit my ability to lead an active and healthy life participating in a range of activities outside of my home. A modest increase would be acceptable but such a drastic increase will only discourage people like me from using public transport as much with a consequent drop in revenue.
