Date of submission: Tuesday, 2 February 2016

Submission: proposed \$9/day Unacceptable

This means \$18/day for Seniors couple (presently \$5)

Unacceptable because \$18 means car use instead of public transport with result being more road congestion (possibility with slower reacting drivers) and loss of revenue to public transport.

Proposed 40% of cap(\$at present \$3.60) acceptable.

Retention of \$2.50 with off-peak travel requirement preferable (Opal Card can do this)

Federal Government reduction in assets test from \$1.1M to \$800K is also relevant

More active seniors has Health benefits which effect government revenue not showing in Transport Accounts
