Submission: Having paid every cent of taxes, levees and duties due to the State for over 60 years and, in return, receiving no concessions or allowances from the State other than having a Gold Opal Card I am dismayed the government is considering an increase to \$9.00 for daily travel on the card.

Makes you feel cheated by the system whereby you do every thing in your power to avoid the pension by being a self funded pensioner.

Truly, people like me consider the \$2.50 Opal Card as an acknowledgement, by the State, that we have made our contribution towards the well being of New South Wales. It is the only break we get but it is treasured so hands off PLEASE!
