Submission: I am completely against the development of the proposed facility in this location. Its proximity to not just our property, but also the town center and local businesses. I believe it would detract from the future prosperity of this growing region and I would be deeply saddened to be forced to live so close to the sewage treatment facility. The noise and light generated along with the water overflow would have significant impact on the residents who are living so close. Other similar facilities which have been built are nowhere near to their respective town center and I don't see why the residents of Cooranbong should be subjected to something which is not done in other areas.
