Submission: I am writing in submission to the review of Opal pricing that the eligibility criteria for student concession cards to be reviewed and consideration given to including NZ Citizens to be eligible for the student concession when studying as a full time fee paying student. I understand this is not a core issue of the review but I believe consideration should be given to providing all domestic students, which NZ citizens are considered with regards to Commonwealth Supported Placement eligibility, with the same level of access to the opal concession card for public transport use.
