

TO WHOM IT MAY CONCERN

As the owners of a waterfront property affected by the review and the proposed formula for calculation of the rental fee we must protest about the way this review has been handled and brought to our attention....namely by phone today ! As there are relatively few to be contacted by your count why didn't you have the decency to write to each affected party in advance and consult with them within a reasonable time frame?....your action only invites scepticism and hostility.....'all in rush,xmas timing,limited advertising,bob carr again, etc'

As we have 210m2 at present this makes continuing with all or part of the lease questionable. Access to the water is via 100M inclinator/36degree slope through otherwise inaccessible block...I wish i had some more time to do this properly, but then that probably is how you want it !

Colin & Jennifer Ryan,
