Subject: What an utter disgrace

How can anyone in their right mind or of sound mind, agree to another proposed train fare. I urge you to travel from Campbelltown to the City, via the East Hills line and particularly via Granville line on weekends.

If there is any justice in this world, the word does not seem to exist in this country any longer, another train fare hike is ridiculous and absolutely unnecessary.

I have travelled many times to 3rd world countries, the fare are low but the service is a tad on the poor side, is a far cry from what we get here for the exorbitant prices we are forced to pay to travel on a train.

If City Rail is not running late, then there are no seats, particularly in the afternoon.

The trains are filthy, graffiti'd, even the new millennium trains, the weekend trains are even worse to travel on, one walks in filth, especially on the old trains, we have to endure annoying passengers, some who have even urinated on the trains, the stench of it all, and you want more money, what for. You are not in a position of need but a position of utter greed for which you have done nothing for your computers, and you certainly are the most undeserving lot.
