Subject: Submission- re: Fair Increase

To whom it may concern,

Im writing to express my dissapoint at the proposed fair increase if 17% for my train fare.

Currently costing \$44 per week, I can see no justification for a rise in costs.

My current issues are:

- The poor state of trains
- Lack of frequency
- No air con
- Only 6 carriages in peak hour resulting in many people having to stand. If I do manage to get a seat, i end up with an ass in my face.
- Consistently late running
- Today, i actually stepped onto the platform only to find my train leaving - 1 min 40 seconds early. This is equally frustrating when I work around a time table and in this case resulted in me missing an appointment.

If the fare increase was to go ahead, i would hope that these issues would be resolved.
