Subject: RE; TRAINFARE HIKE SYDNEY

To whom it may concern

This in reference to the submission for rail fare hikes by 18%.

I live in the Hills District and travel by train from Seven Hills to the City daily.

Over the past years the fares have already had a substantial hike in proportion to the service and quality that is provided and am not all in favour of any price increases.

I also object to the mention that the average worker earns \$97,917.00.

I am nowhere near this figure and am certain majority of others are in the same boat.

This is the reason for using public services or we would all be driving.

I strongly oppose the move until we are provided with adequate rail services.
