Subject: Train fare increase

To whom it may concern:

People will be very upset if you increase the fares as the economic crisis is looming over us.

I dont want to start with the condition of the trains...why the increase?

I am paying \$72 every week for my husband and my train fare , actually u should decrease the weekly tickets or give us a discount instead of increasing as the trains are dirty and dont have air conditioning in the Bankstown line.

If you planning to increase the fare you should provide better quality trains with air conditioning, cleaned not the ones we have in out line which are dirty , full of grafitti and stuffy.

Dont increase the fare as people will be very upset with city rail for been greedy..you already take a lot of money from us the whole year, we work but dont receive the wages you think.
