**Subject:** Cityrail fare increase

Hello,

I would like to point out my disappointment at city rail wanting to increase fares yet again. They have recently dumped projects due to funding, more like poor project management and budgeting. Trains dont have air conditioning, with australian summers up in 38 degree heat and most people spending about 1hr travelling on these saunas. They dont have windows that ventilate the trains well enough to get by without air conditioning, all the trains need to be upgraded.

There a thousands of people that are delayed daily due to city rail trains running behind time or being cancelled. Before they charge us more to use this redundant transportation system. They should prove to us that this system is worth paying more for.
