Subject: Proposed Fair Increase

With the current price of petrol and the situation regarding the environment, a price rise for travel on public transport would not be in the interests of all Australians. Instead:

- the maintenance of the trains, buses and ferries should be checked
- people should be encouraged to take public transport by having the transport run on time and be clean
- the untangling of the different lines should continue as this will assist with reducing delays across the whole system.

Putting up the fares will not increase patronage; reduced fares and better running will!
