Subject: Transport Fare Hike

Re: City Rail fare hike

Dear Sir / Madam,

I remember the last time the City rail decided to increase their fare, the argument was that the services would improve. Well sad to say that after the last hike no improvement was seen in regards to timekeeping, other services. I do believe that in the current situation in the financial market a lot of people are already in a knives edge trying to juggle all their budgets and leaving them with no savings in time of need. This request for a fare hike is not justified and I believe that good government should start from the heart and not from the pocket, besides people wont be in government if they don't have people to govern.

Thank you
