Subject: Power bill increase

I would like to register a complaint about IPART's recent decision to increase electricity costs to consumers by 21% extra. In this economic world crisis it will place severe hardship on people already struggling to make ends meet. The current cost of living is really affecting me, like many others and such a high price rise for power as this is beyond belief. I would have thought a more conservative decision in this most extraordinary economic crisis would be more appropriate.

I ask IPART to please reconsider this increase to a lower amount and revisit when the economy picks up a bit.
