Subject: Metropolitan Water Prices

The proposal is a **super tax on big families** in Sydney (we don't have a Commonwealth Health Card).

My husband and I have 6 children from one marriage and we are doing all we can to save water, we have saving devices on every shower and toilet, children use same bath water etc , we don't water at all our small garden.

The proposed increases are very unfair and a **super tax on Big families**. Its clear discrimination of parents who have large families.

Please can you respond to this e-mail and show some understanding of our finical reasons for this unfair super tax on parents that have more than 2 children.
