Cityrail submission

The only thing consistent with Cityrail is its poor weak performance over the last few years! As a commuter I've grown accustomed to the late dirty overcrowded trains.

I would like you to ask **1 question for Cityrail**....How can they be crying poor when they are collecting all that **extra revenue from firstly the cancellation of offpeak services** and also the **extra revenue they are collecting each and every day from the Transit officers** ??????

It is interesting to note that the extra revenue these officers are collecting is NO WHERE to be seen on their submission nor are the savings made by cancelling those off peak services for which they want to charge us an extra 25%

Imagine paying extra for a reduced service...it's like paying for 2litres of milk but only getting 1litre...THIS A RAW DEAL!

You would think Cityrail would be encouraging people to use the trains not drive them away (literally) with higher prices on fares at a time where our roads are already clogged.

Thanks

A.Smith
