6 Car Trains in Peak Hour

I catch trains from Wynyard to Strathfield from 5.45pm - 6.30pm. There used to be approximately 50% of trains with 8 cars which were bearable. Now EVERY SINGLE ONE of these trains is 6 cars and packed like sardines - if you could just add a couple of carriages to peak hour trains at least half of the whinging regarding rail services would cease. It staggers me that your organisation cannot figure this simple problem out.

Thanks for your time,

Brendan Egan
