Our rail system..

I have been commuting for four years now - something I would never of contemplated once upon a time...

Time and time again, I think back to the Sydney Olympics - we got public transport right for that - what are we "show ponies"??? Put the prices up when the commuters are happier - there is still much unrest.

Then again last week I had the misfortune to be travelling by car from the Sydney CBD to the Blue Mountains in peak hour - at least on the train I'm relaxed... it's a quandry that is for sure!
