Subject: complaints about a proposed four year 25 percent train fare increasing

Dear Sir/Madam,

I am a everyday city rail commuter for over 10 years. My wages is not going to increasing for 17 percent next year. Why I should pay up to 17 percent increasing after 1 January 2009? After the new time table I spend more than 5 minutes each single journey to go to work and to get to home. We offer do not get air condition train in the hot day or in the cold morning. So many service have been cancelled since the new time table. Why should we pay more for the poor service we get?
