

Hi

I think it is an outrage that the bus fares will be increasing.... again. Only recently my weekly pass went up. If it improved the bus system in any way this might be a justifiable action but as far as I am concerned the bus system is getting worse! I travel on the 545 in my local area and also the 288, 292 and 293 to the city. No matter what time of the day I am lucky if the bus turns up on time, actually stops and if this occurs to get a seat is a minor miracle. It is beyond a joke and not only making me angry but effects my life in the fact that I cannot get to appointments or even work on time due to the unreliability of the service. I find I need to set out hours before going anywhere in case the bus does not turn up or is late. I particularly find the 545 shocking. It is constantly full of Uni students and so full you cannot get on or off and this is a major safety issue.

I am not the only on who feels this way but perhaps one of the very few who decides to speak up.

I have lived in the US and the UK and this is the worst bus system I have encounter. We need more buses on the roads, running at more regular intervals to say the least.
